

It is widely known to all Global Crossing (GX) shareholders that there is a "higher offer" from COMMAXXESS to bid on this bankruptcy company. Karl Schwarz, the CEO of COMMAXXESS is a highly respected man with integrity, a true American patriot, to fight against this fraudulent case for and on behalf of existing shareholders.

According to recent Filings by COMMAXXESS before FCC, a question is raised by all shareholders why GX Management team and Unsecured Creditors support the "low offer" of STT over higher and better offers, one from COMMAXXESS with shareholders included. For simple reasons, none other than frauds, I would draw the attention to all FCC members that COMMAXXESS has finally found a former GX engineer, out of conscience and guts, to come out and let them know all about what GX was doing. I leave this to the Commission to investigate.

Now for fear of being looked into the scam, GX come up with a recent invitation of Leucadia National as a buyer of GX to prevent COMMAXXESS from taking over GX and cleaning it up.

In light of recent Blackouts in the Northeastern region, the closure of GX's one of the few "profitable" divisions - ConferTech, hence the cut off of 100 jobs, it is imperative for FCC to look into these critical situations immediately, apart from those relevant points mentioned before.

I urge the Commission to STOP GX Management team from manoeuvring the deal with STT to prevent other higher bidders to compete. It is important for the sake of National Security and the infrastructure of this network system, one of its kind, to be retained and controlled by American people. Enough is enough and no matter how GX/STT come out with compromises to the deal, it should be American owned with existing shareholders included as a Vote of Confidence to the investment world.

Thank you for taking the time.
